

World IPv6 Day Measured

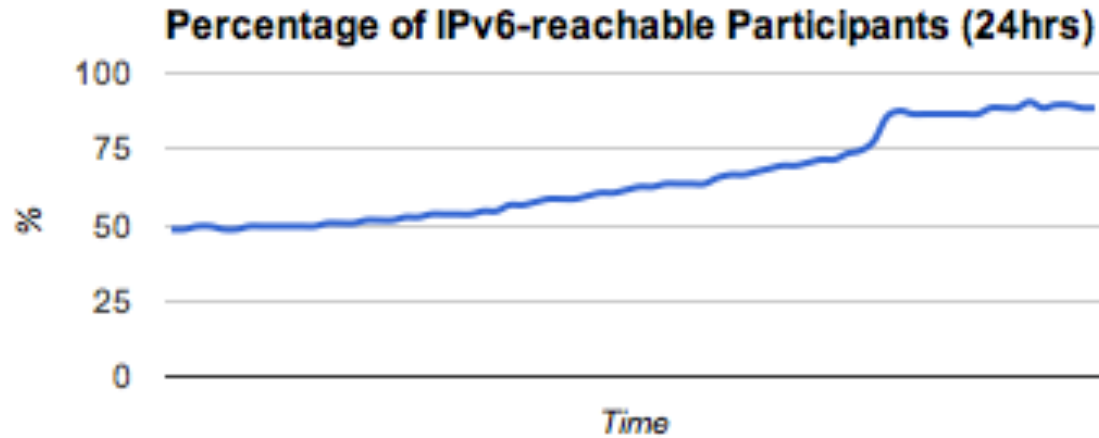

Daniel Karrenberg
Chief Scientist

ISOC Dashboard This Morning

Last updated: Wed Jun 8 11:11:25 UTC 2011.

Single Vantage Point Limitations

Multiple Vantage Points

RIPE NCC Dashboard

- 40 vantage Points
 - CAIDA: Ark
 - RIPE NCC: TTM
 - Friends
- Not all Participants
 - No capacity
 - Next time

Vantage Points (CAIDA, RIPE NCC, others)

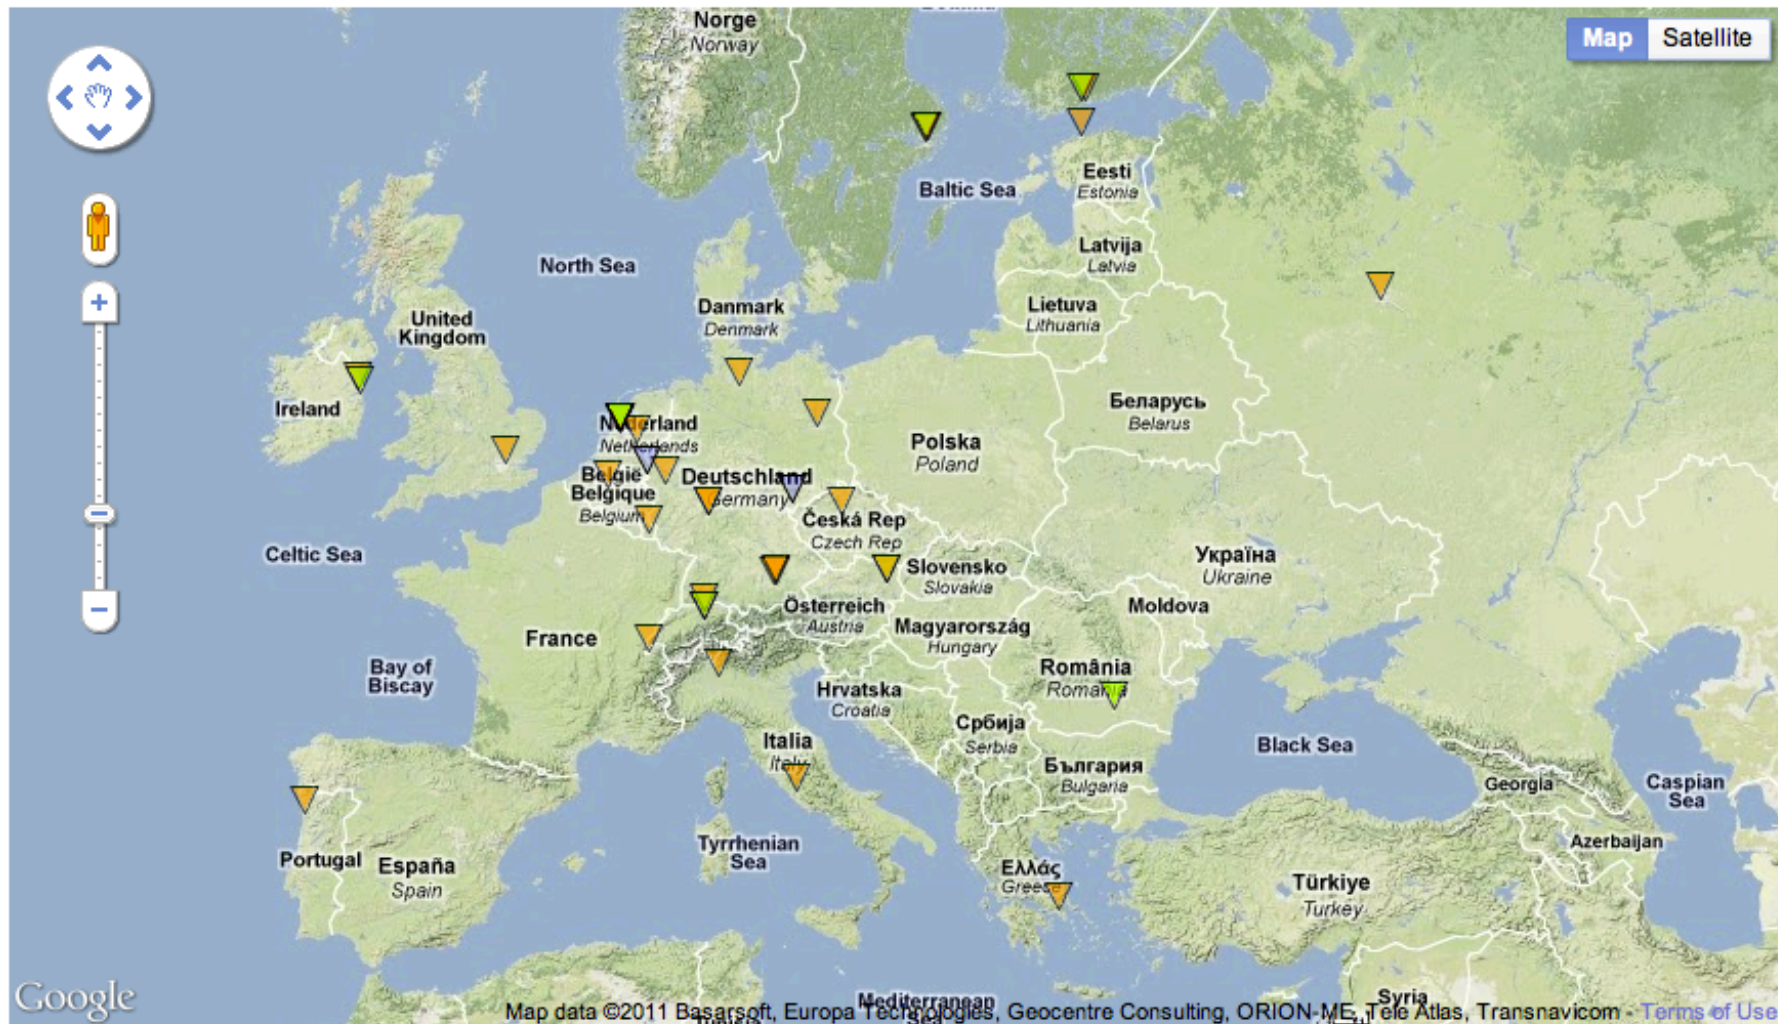

▼ CAIDA Ark ▼ RIPE NCC TTM ▼ Other

Vantage Points (CAIDA, RIPE NCC, others)

▼ CAIDA Ark ▼ RIPE NCC TTM ▼ Other

Measurement Limitations

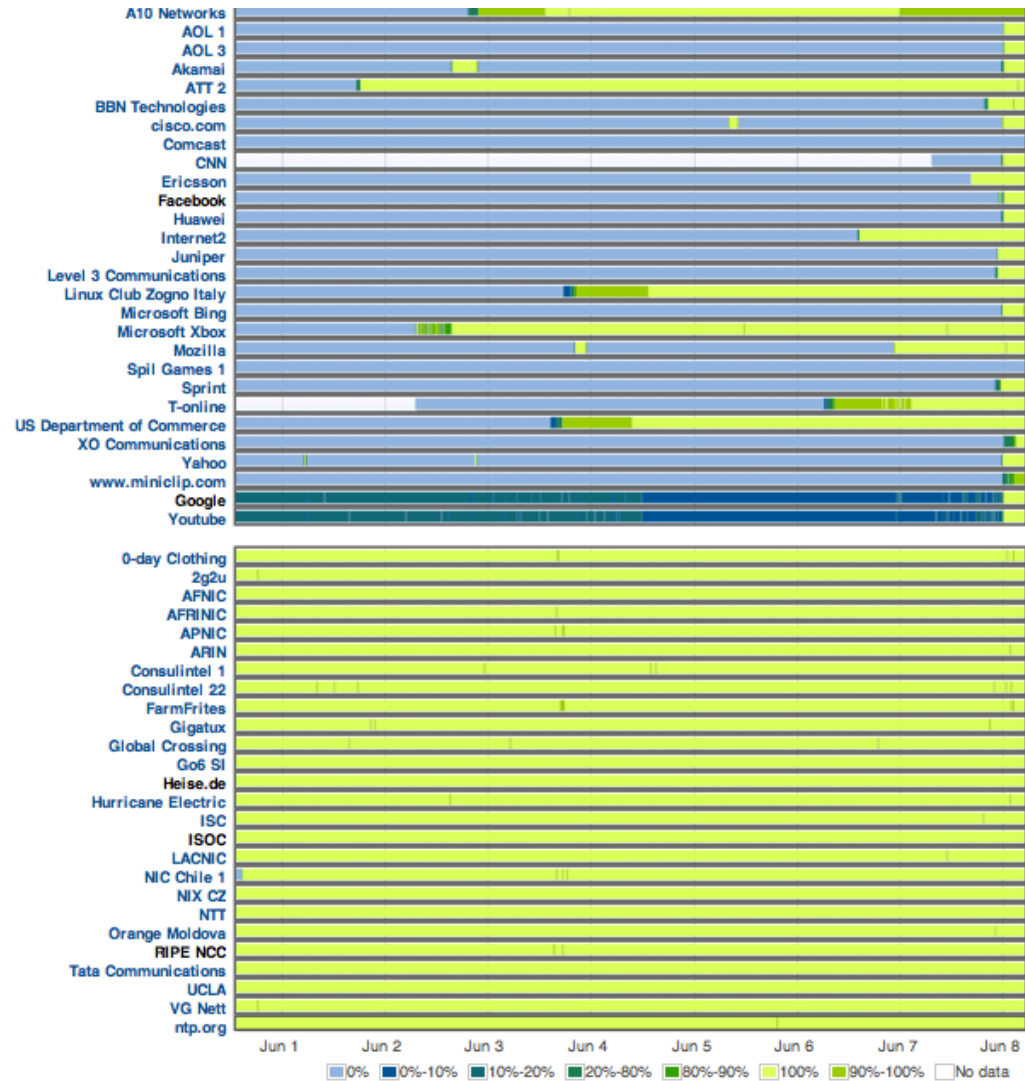

- Almost all vantage points are in the network rather than at the edges
- Most are doing other things as well
- Web site designed ad-hoc and on single server, so it can be slow

v6day.ripe.net

DNS During the Week

- Blue: no IPv6 Address Published
- Green: IPv6 Address Published (AAAA RR)

Presenter Name, Date

After the Day

- We will keep measuring
- All data remains available
 - Via v6day.ripe.net page
 - Raw data (if requested)
- We will do more analysis in the coming weeks

Akamai Measurements Today

<http://www.akamai.com/ipv6>

Wrap Up

- Hoped for a very boring World IPv6 Day:
Seems to be true.
- We expect experience and data will show that
 - Internet IPv6 at large is (and has been) production ready
 - If not: know what to improve
- Keep an eye out on <http://labs.ripe.net> for the latest on measuring World IPv6 day

Questions?
