ENOG 3, Odessa 2012

# Who we are

---

- Ukrainian company focused on providing flexible peering services for national and foreign operators.
  - We're following the:
    - Openness
    - Independence
    - Flexibility
    - Equal opportunities for all participants
-

# The Past

---

- ❑ Founded at **2009** as an experiment and wish to utilize two derelict Catalysts 3750
  - ❑ Used to be a kind of a toy for first **7** participants
  - ❑ Around 1Gbit/s of traffic in the beginning
  - ❑ Only one Point-of-Presence in Ukraine
-

# The Present

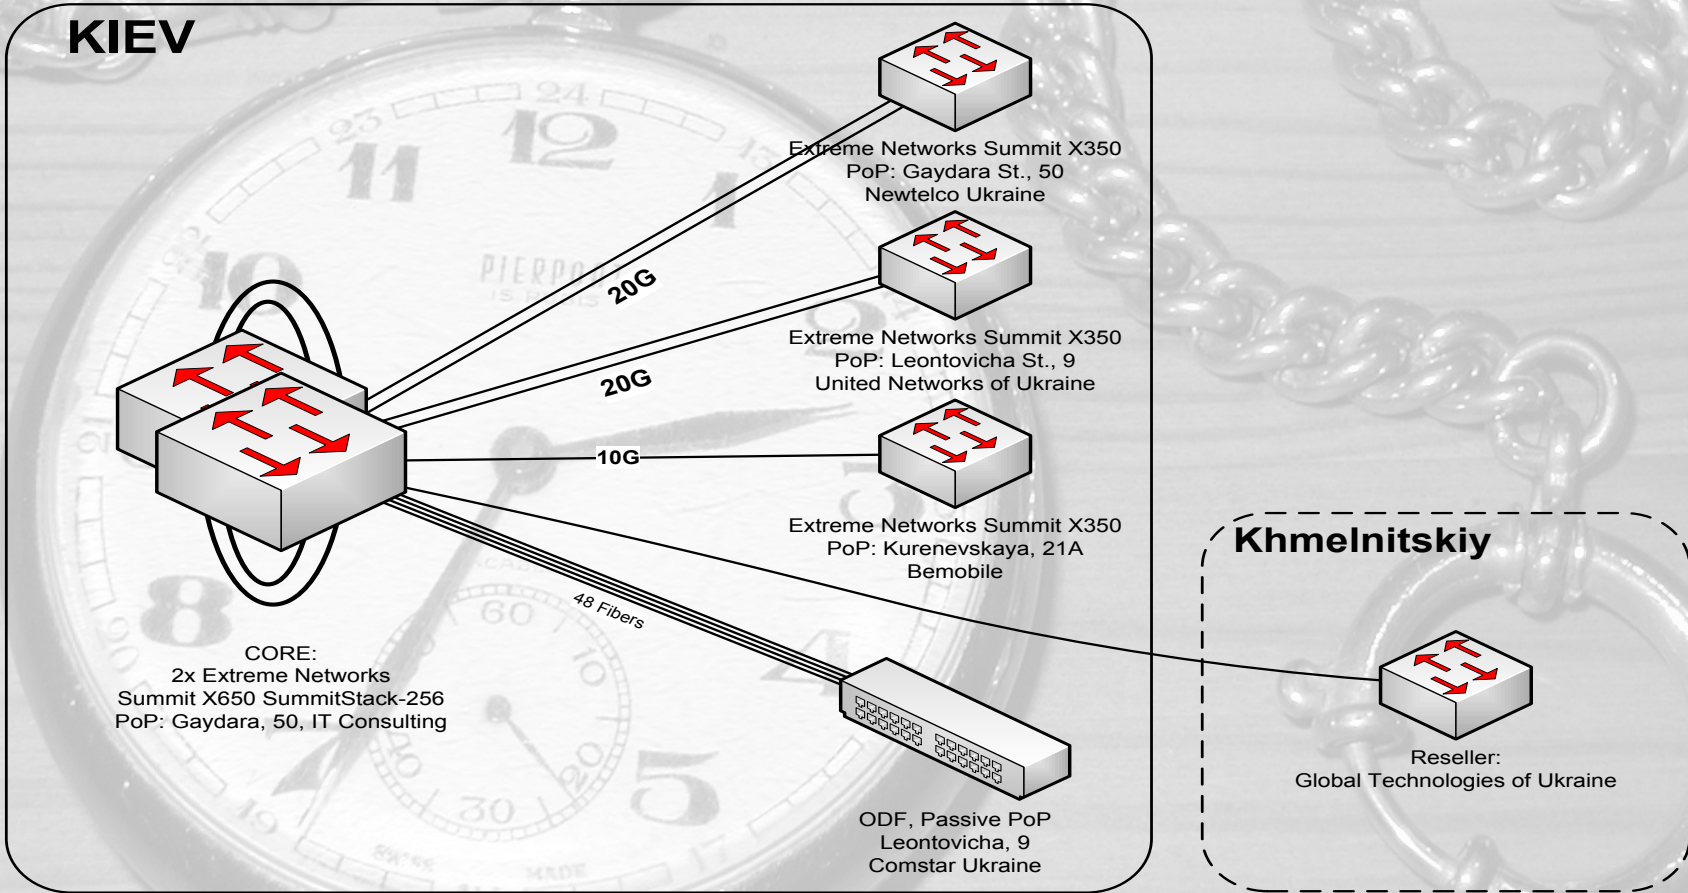

---

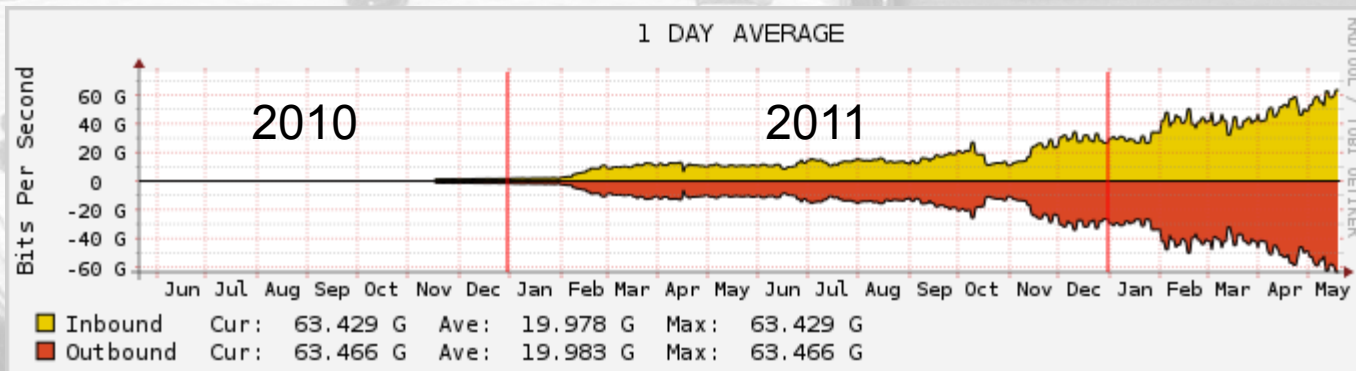

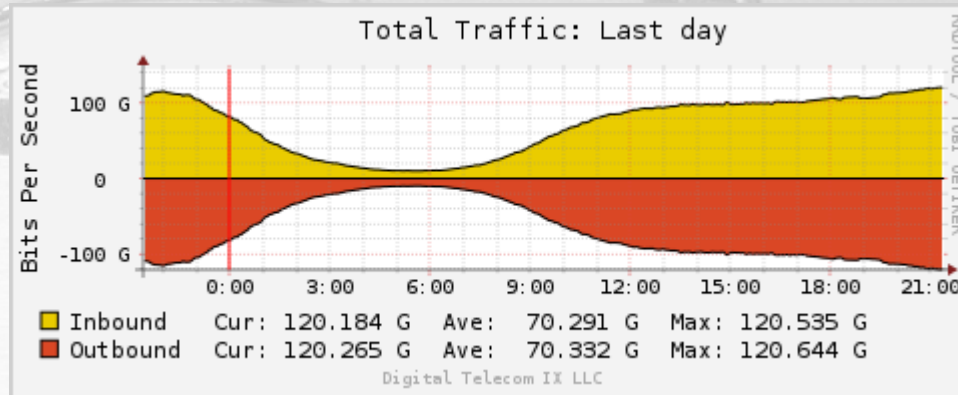

- **67** participants (61 national and 6 foreign) utilize **34 10G** and **38 1G** ports.
  - $\approx$ **8400** prefixes for  $\approx$ **6300** networks.
  - Daily traffic peak is near **125** Gbit/s.
  - **15** private **Layer 2** peerings.
  - **5** PoPs in Kiev, **1** reseller in Ukraine
-

# The Present

# The Present

# The Future

- Eliminating Extreme Networks switches from Core in favour of other vendor
- Migration from Layer-2 Core to Layer-3 Core
- Bringing route-servers to conformance to drafts "Internet Exchange Route Server" and "Internet Exchange Route Server Operations"
- Expanding of network via resellers
- English version of website
- 100G ports will be available this year

# Our partners and resellers

---

## □ Partners

## □ Resellers
