Company overview

NEWTELCO

- Founded in 2005 at Europe's telecommunications and Internet hub in Frankfurt
- NewTelco is a private company presented in eleven locations all around the world
- Currently NewTelco also has its own data centres in Kiev (Ukraine) and Tbilisi (Georgia)
- In 2012, NewTelco opened its latest purpose-built premises in Georgia – to become the first carrier-neutral data Centre in the whole Caucasus region
- NewTelco Georgia Datacenter is located at the central part of Tbilisi
- Datacenter was designed and equipped according to the international standards

What we offer

NEWTELCO

- ✓ Carrier neutral connectivity
- ✓ Meet me point
- ✓ Guaranteed power
- ✓ Back up power supply
- ✓ Industry recognised UPS units with N+1 configuration
- ✓ Smart cooling and temperature control
- ✓ Advanced fire detection and suppression system
- ✓ Safety and 24/7 monitoring
- ✓ 24/7 Authorized persons access to the equipment

Current Challenges

NEWTELCO

- ❖ Competitiveness on the market
- ❖ Telecommunication infrastructure sharing
 - ❖ Bandwidth price
 - ❖ No IXP Existence
- ❖ Knowledge of disaster recovery service importance
- ❖ General responsibility for the Continuity Service importance

Solution

NEWTELCO

- **Government engagement on TAX regulations for foreign ISPs / Carriers**
- **NewTelco Georgia is already working on IXP to make it available for its consumers**
- **Boost the knowledge of the importance of Data Center role in today's challenges**
- **Improving technology in developing countries is making a big impact on healthcare, education and the economy. New technology is now being looked to as a solution to improve life in countries like us.**
