# RIPE Networking App

Ihor Marhitych
Software Engineer
RIPE NCC

Ihor Marhitych | June 2019 | ENOG 16

# What is the RIPE Networking App?

- An application that works on desktop, but also Google and Apple mobile devices

- Helps you meet and private message fellow attendees

- View the agenda of the meeting

- Schedule meetings and plan your time more efficiently

# Why Have an App?

- Requested at many meetings

- Attendees want to meet and connect easily

- Most people use mobile devices at the meeting

# How Does It Work?

- You need a RIPE NCC Access account

- Go to https://networking-app.ripe.net to use the desktop version

- Go to the device's store and search for the 'ripe networking app' to use the mobile app version
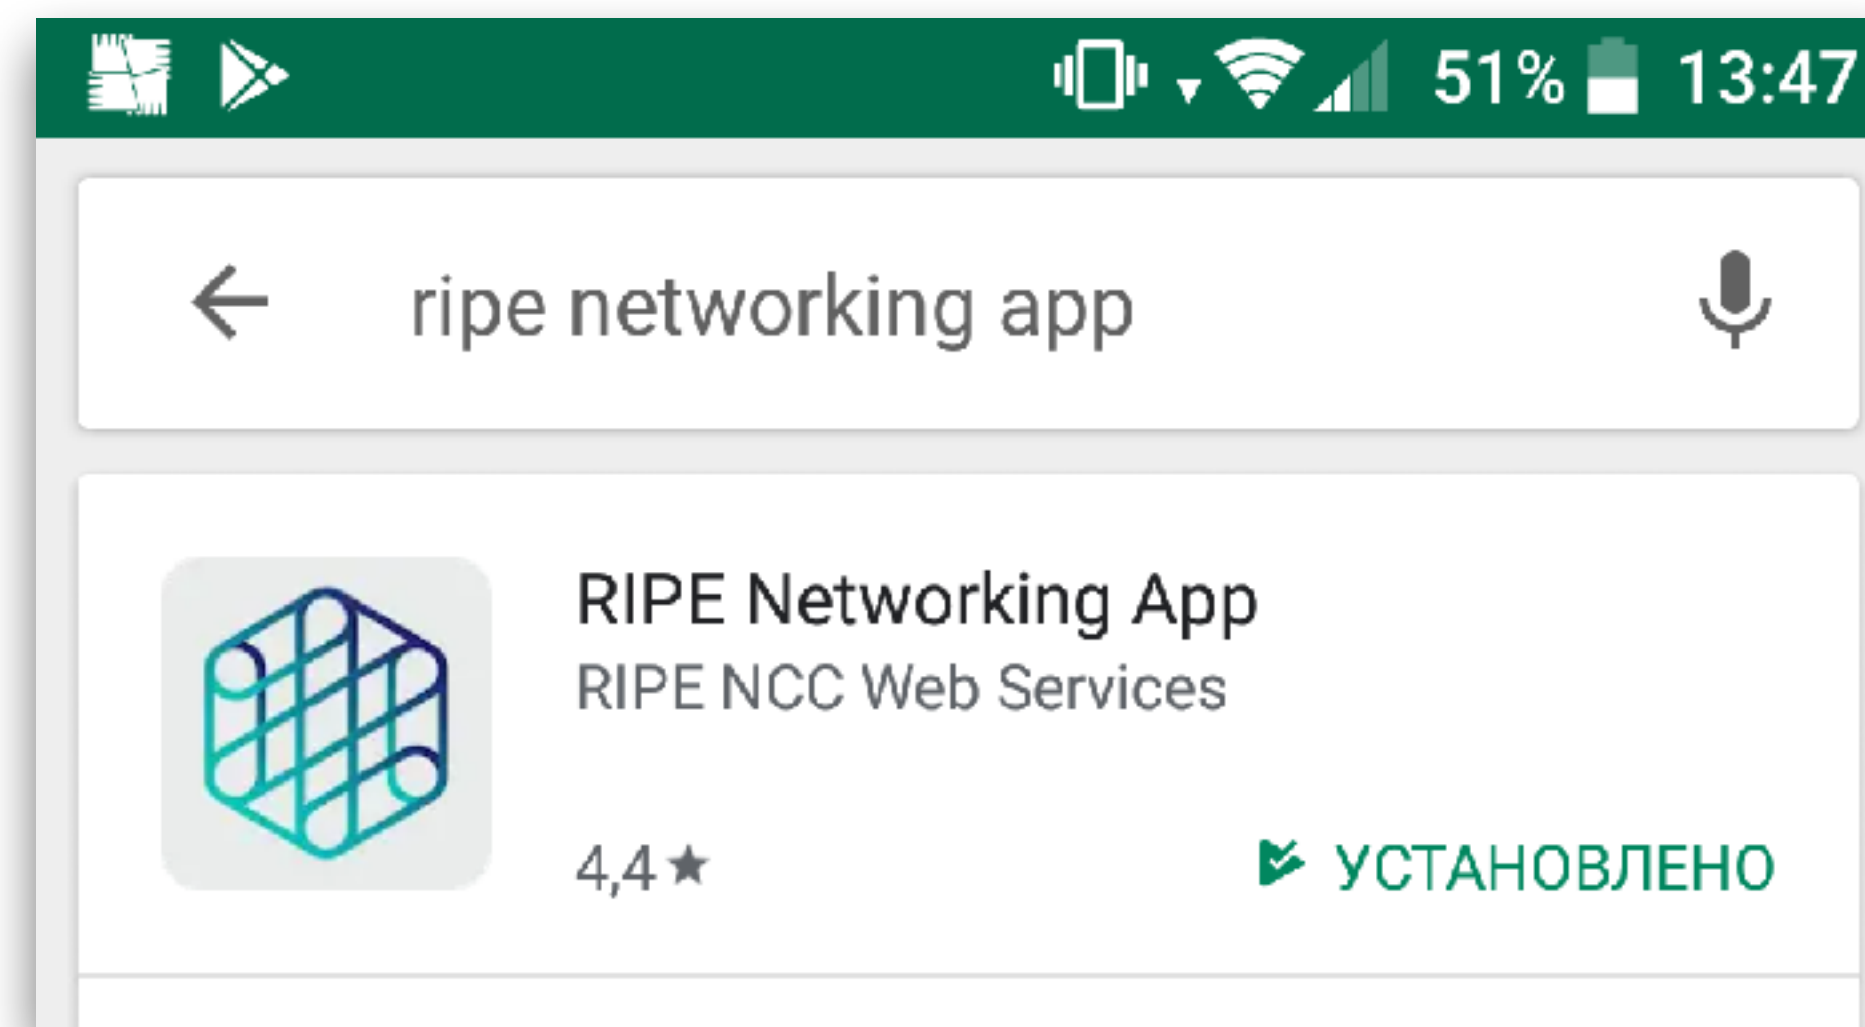

# What Can I Do?

- Schedule meetings
- Invite app users
- See the Agenda
- Manage meetings
- Receive push notifications

# What Can I Do?

- View the attendee list
- View the app users list
- Search by tag or company name
- Send messages to app users

# What Can I Do?

- Set up a profile

- Export your data

- View the events history
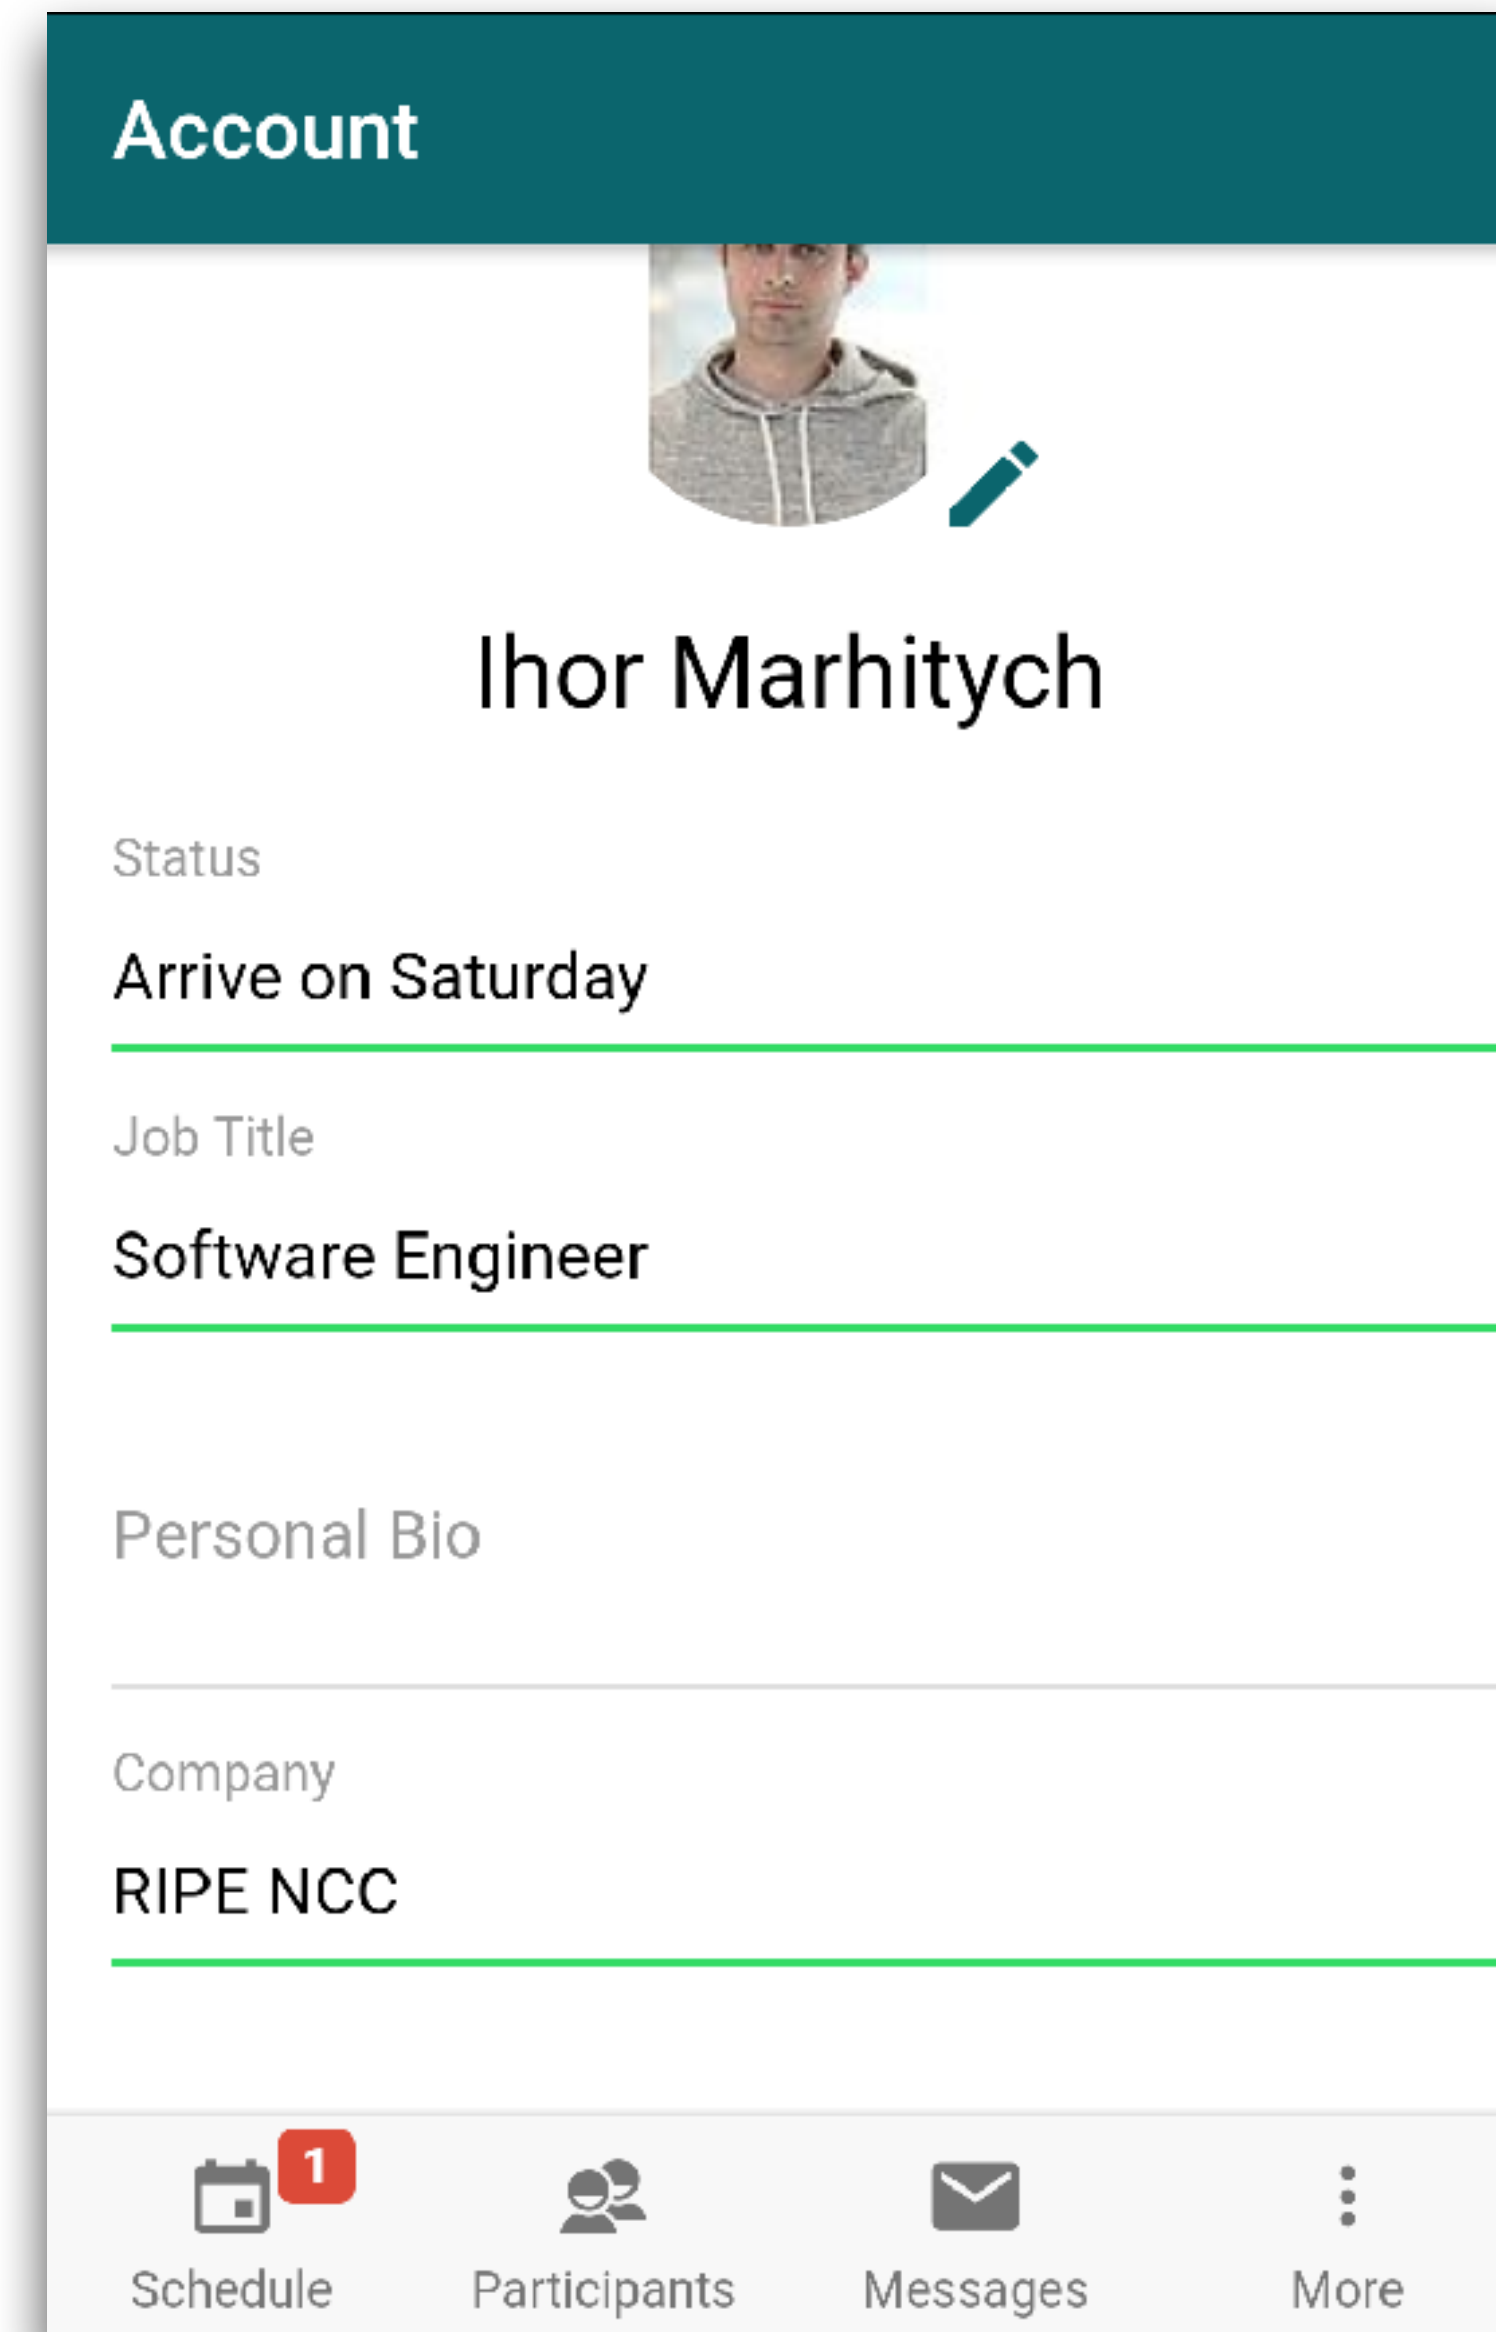

# Issues When Creating a Mobile App

- Speed of development

- Multiple platforms, multiple problems

- Push notifications

- Different deployment methods - Google and Apple
